PROJECTS

Mtech Project `Jan 2019-Present`
CC5gRAN:Energy Efficiency in Converged Cloud Radio Access Network for 5G
   The main objective of this project is to develop prototype products on converged cloud based multi-RAT system to realistically study energy efficiency aspects of various C-RAN split options and multi-RAT connectivity services in 5G and thereby develop realistic energy models to understand tradeoffs involved in energy savings and network throughput.

Major Project `Aug 2017 - Apr 2018`
Phishing detection using machine learning
   We have developed a machine learning model using logistic regression to detect Phishing URLs.

Minor Project `Feb 2017 - Apr 2017`
Optical character reader using android Vision
   We have developed an Optical Character Reader Android App using Android Vision API.
